56
CL } 28. The computer according to claim 25, further comprising code to
receive a second electronic instruction from the prospective depositor for authorizing
the bidder who submitted the winning bid to access a real identity of the prospective
5 depositor for a second selected period of time.

29. Computer executable software code stored on a computer readable storage
medium, the code for soliciting competitive terms of deposit over a network
accessible by a plurality of users within a first selected period, the code comprising:

10 B2 } code to receive, at a host computer, a deposit application from a potential depositor
over said network, the application comprising permissible personal information and
terms of deposit on offer as subscribed by the prospective depositor;

15 code to receive from a host authorizer an electronic instruction indicating that the
deposit application is approved for solicitation and display over the said network;

code for assigning a handle to conceal a real identity of the prospective depositor
when the deposit application is displayed over the network;

20 code for maintaining data representative of the status of the prospective depositor's
application, the data comprising information on at least one responsive bids;

25 code for receiving the at least one responsive bid from a bidder for the deposit
application, wherein the responsive bid comprises proposed terms of deposit, type
of guarantees, payment schedule, deposit rate, securities in exchange and terms of
exchange;

30 code for receiving at the host computer from said prospective depositor an electronic
instruction indicating a selected bid of the at least one responsive bid; and

code for notifying the respective bidder who submitted the selected bid that he is the
successful bidder.
